

# Gratitude Flower

You will need some colored paper, glue, and scissors.

1. Cut out the template pieces below to trace on the colored paper.
2. Use the circle as the center of the flower. This is also a good spot to write in your name.
3. Trace and cut out as many petals as you would like. Write down or draw on each petal one thing you are grateful for today. Make sure to leave a little bit of space at the end to glue onto the circle.
4. Glue the petals to the circle to make a flower.
5. You can then glue the flower to a big piece of paper or cardboard and hang this up for your family to see.
